GITHUB

iits-wajd

BORN

01 Jun 2007

CORE SKILLS

- PHP & MySQL
- Python Automation
- JavaScript / React
- HTML, CSS, Tailwind
- REST APIs
- Admin Dashboards
- Web Scraping
- Telegram Bots
- Network Security
- Linux Servers

LANGUAGES

- Arabic - Native
- English - Good
- French - Good
- German - Learning

TOOLS

- Git & GitHub
- Docker
- Linux Server Admin
- Nginx / Apache
- CloudPanel / cPanel
- VPS Deployment
- MySQL Workbench
- Postman & API Testing
- VS Code
- Cloudflare DNS

Full-Stack Developer

Automation Developer with Network Security Experience

PROFESSIONAL SUMMARY

First-year Computer Science student at the Lebanese University and Full-Stack Developer with experience in web development, automation, scraping, backend systems, admin panels, Telegram bots, and network security fundamentals.

Started learning programming in 2019 with Python, then expanded into PHP, MySQL, JavaScript, React, backend development, automation, and cybersecurity. Completed courses in cybersecurity, object-oriented programming, and software development.

TECHNICAL STRENGTHS

- Builds full-stack web systems using PHP, MySQL, JavaScript, React, HTML, CSS, and Tailwind CSS.
- Develops admin panels, dashboards, authentication flows, APIs, and business management tools.
- Creates automation and scraping tools for data extraction, Telegram workflows, and repetitive web tasks.
- Applies secure practices such as input validation, access control, and safer authentication design.

WORK AREAS

Websites & Web Platforms

Responsive business websites, portfolio systems, landing pages, dashboards, and custom web applications.

Backend Systems & Admin Panels

PHP/MySQL backends, authentication, role-based dashboards, database workflows, APIs, and management panels.

Mobile Apps

Android applications connected with backend services, databases, and custom business logic.

Desktop Programs

Business desktop software, accounting tools, reports, exports, backup flows, and offline database systems.

Automation & Tools

Automation scripts, scraping tools, Telegram workflows, data extraction utilities, and productivity systems.

Security-Aware Development

Projects built with attention to validation, access control, safer login flows, and network security principles.

EXPERIENCE

Freelance Developer | Lebanon | Self-employed

- Built websites, admin panels, dashboards, and business tools.
- Developed web automation and Telegram workflow systems.
- Created scraping tools for data extraction and research.
- Designed responsive interfaces and connected them with backend systems.
- Used security-focused practices including validation and access control.

EDUCATION & TRAINING

Lebanese University - Bachelor's Degree in Computer Science, First Year

Cybersecurity courses, network security fundamentals, object-oriented programming, web/backend development, and self-learning in programming since 2019.
